

AELIS™

Meet Federal Reporting Requirements and Manage Your Adult Education Programs in Real Time

How do you keep up with changing Federal reporting requirements? Are your software tools flexible and adaptable? Do they help you manage your programs and provider organizations? Can you access your tools anywhere—from your tablet or other mobile device? How fast can your tools developer respond to changing requirements? Can you easily get technical support when you need it?

Now, with AELIS,™ the Adult Education and Literacy Information System from Hardwick Software, you can easily meet National Reporting System requirements **and** manage your state’s programs and providers.

Facilitate NRS Reporting and Stay on Top of Changing Requirements

AELIS gives you the tools you need to meet NRS requirements. We track evolving Department of Education and NRS standards, ensuring your AELIS stays **up to date** and **compliant** with current reporting requirements.

Meet Your State’s Unique Needs and Stay Current as They Evolve

Every state has its own unique needs, from particular educational programs with specific management and reporting requirements to interfaces to state-specific data systems. And, these needs can change frequently, as programs and requirements evolve. AELIS’ modular design makes it **fast** and **easy** to adapt to your state’s programs and systems—to how **your** state works. With AELIS, you can avoid in-house development queues and other resource limitations.

Manage Your Programs from Anywhere

Much more than a mere reporting tool, AELIS helps you manage your programs, your providers, and your students. AELIS is web-based. You can enter and view data interactively—and securely—from your desktop, laptop, or tablet; in your office, on the road, or at home—from anywhere!

Get a Quick Overview of Key Data with “At-a-Glance” Snapshots

AELIS “snapshots” let an instructor see everything about a student at a glance, or let an administrator perform an audit with a single click.

Deploy AELIS to Your Provider Organizations with Fine-Grained Security Controls

With AELIS, security and confidentiality are built in. Each user has unique security credentials; their access is limited, based on the **role** and **program association** you assign to them. Give your staff access to manage programs statewide. Then, make the job easier by letting each program provider manage its own student data and reporting interactively—**on the spot**. AELIS lets you eliminate reliance on paper reports and after-the-fact “mail-it-in” data entry.

Send Notifications of Key Events

You can have AELIS send your users alerts of key events, by email or text message. For example, send an email reminder automatically before the close of a billing cycle, alerting users to their data entry deadline. Or, let AELIS remind your providers of individual student assessments coming due.

Gain Peace of Mind

AELIS is a hosted solution that is entirely web accessed; there’s no need to deal with in-house servers or other hardware or software installation and support issues—unless you want to.

With the AELIS team supporting you, you can skip worrying about loss of subject matter expertise and corporate memory due to staff turnover.

You Get a Proven Solution with Solid Support

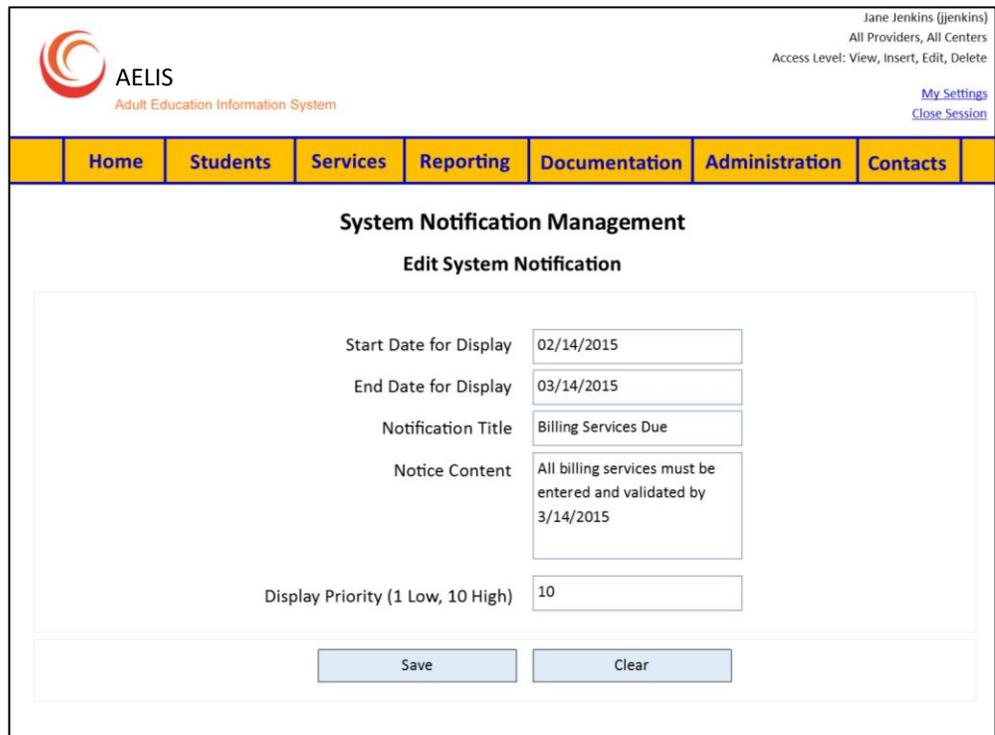

As the foundation for the Vermont Agency of Education Adult Education information system, AELIS has been deployed for over three years. Now, Hardwick Software is making AELIS available nationwide. This means you’ll get a proven solution with solid, responsive technical support.

About Hardwick Software

Hardwick Software provides custom software solutions that make businesses more efficient. We build on over 35 years’ principal staff experience in software design and implementation. Since 2004, Hardwick Software has provided the Vermont Agency of Education with superior tools for managing and reporting on Adult Education and Literacy programs.

The screenshot shows the AELIS web interface. At the top left is the AELIS logo and the text "Adult Education Information System". At the top right, it displays the user name "Jane Jenkins (jjenkins)", "All Providers, All Centers", and "Access Level: View, Insert, Edit, Delete". There are links for "My Settings" and "Close Session". Below this is a navigation menu with tabs for "Home", "Students", "Services", "Reporting", "Documentation", "Administration", and "Contacts". The main content area is titled "System Notification Management" and "Edit System Notification". It contains several input fields: "Start Date for Display" (02/14/2015), "End Date for Display" (03/14/2015), "Notification Title" (Billing Services Due), "Notice Content" (All billing services must be entered and validated by 3/14/2015), and "Display Priority (1 Low, 10 High)" (10). At the bottom are "Save" and "Clear" buttons.
